All sessions will be held online. The link will be announced later

Last date for Registration: December 5, 2021

All participants shall get a certificate of participation at the end of course

Aim

Emphasise the importance of legal knowledge and skills for engineers and stakeholders in the construction industry

Objectives

Improving the understanding of contracts and contract-based construction processes

Creating awareness about common challenges during formation and performance of contracts to avoid legal disputes

Outcomes

Clarity in understanding and interpret contract documents

Grasp of common mistakes which result into breach and termination of contract

Skills and knowledge to explore possibilities of dispute resolution before resorting to law and court proceedings

Topics

1. Basic Legal Concepts Governing Construction Contracts and Components of a Construction Contract
2. Forms of Construction Contracts (Standard Form; FIDIC Rules for International Contracting)
3. Processes in Formation of Construction Contracts particularly Government Contracts (Bids, Tenders)
4. Financial Instruments to Safeguard Performance
5. Main Disputes in Construction Contracts: Delays, Price Variations, Scope of Work, Termination
6. Contractual mechanisms to deal with anticipated variations and causes of disputes and Dispute Avoidance Processes
7. Dispute Resolution Methods: Non-Adjudicative, Adjudicative
