**TECHNICAL TRAINING INSTITUTE**

No: Trg/28/VT/2017

DATE 17-03-2017

Dear Sir/Madam,

**sub: Restricting the number of students for Industrial/Internship/  
project based training.**

Visakhapatnam Steel Plant has been extending training facilities to the students of colleges/institutes/universities till now. The number of students during the months of May –June is increasing alarmingly and uncontrollably year by year particularly during the months of May-June as shown in the following Table.

**Students training year- wise**

Year	Number of Students undergone training		
	During April-June	During Remaining part of year	Total
2014-15	6200	1032	7232
2015-16	7860	2142	10002
2016-17	7859	2241	10100

And it has become a safety concern for all the stakeholders at different levels in the plant and is causing inconvenience for proper planning and execution of their training effectively. In view of this and due to the following constrains VSP management has decided to reduce the number of students' intake to a manageable level without compromising the safety and quality of training.

- a) **Safety:** VSP has doubled its capacity leading to increase in transportation of raw materials and products, poisonous gases dust and fumes etc. The steel plant operations are inherently hazardous and the doubling of capacity has increased the probability of untoward incidents in the plant.
- b) **Facilities:** VSP is experiencing great difficulties in accommodating such a large number of students in class rooms and the canteen , washroom, and arranging transport etc
- c) **Logistics:** Since VSP does not have it's won transport system the students are crowding on the roads at different junctions outside as well as in side the plant asking for lifts thereby causing an un- safety conditions to themselves, to employees and the management as well.

- d) **Availability of projects and guides:** Availability of Guides is increasingly becoming difficult due to increase in production and maintenance related activities. And as a result the number of projects available in VSP has come down.

Hence the Colleges/ Institutions / Universities and all others who are recommending students are hereby requested to cooperate with VSP Management to serve them better by :-

- 1) sending only VI and VII semester students .
- 2) restricting the number of students to two from each branch
- 3) distributing sending of the students for training to VSP throughout the year in order to avoid rush during summer i.e., May-June.
- 4) advising the students to compulsorily utilize the transport arranged on payment basis and attend training with safety shoes and safety helmet, and follow all the safety precautions during their training at VSP.

In order to accommodate maximum number of students, within manageable number, the training period is fixed to two weeks only for all.
