

1. Make a function generator, whose output front panel should be like in figure below Deadline - before the instrumentations Lab.

2. (Optional) Make a simple calculator complete with hex pad and numeric display. The best calculator will very much resemble calculators available in market. The assignment is quite involved and I suggest you should start now. Deadline: May 18, 2400 hrs. If you start and are unable to complete the calculator, still mail whatever you have made to me .

Mail me whatever queries or drop by my room F-314/1 anytime.
