

Mr. Ellia is an Engineer and Doctorate in Physics. He has worked 10 years in the field of nuclear safety for BWRs and then for PWRs at Framatome, now AREVA NP, when the French Nuclear Program was under development at full speed. From 1983 on, in the then Framatome, International Directorate, he took part in a number of bids and negotiations on the export market, in particular in China for technology transfer for the Qinshan phase II units and for the supply of nuclear islands for the Daya Bay and Ling Ao plants. From 1998 he was Executive Vice-President of the common subsidiary of Framatome and Siemens KWU in charge of the development of the EPR and of the reactors marketing for both Companies. In 2000 he was deeply involved in the merger of Framatome and of Siemens KWU, now AREVA NP. He is now Vice-President for Reactor Marketing at AREVA.
