Tutorship Requirements for Ph.D students

- All Ph.D students of Y10 or later batches will have to serve as tutor in either core courses or professional/PG courses with laboratory component for at least one semester.
- All new Ph.D students admitted from 2015-16 1st semester onwards will be asked to submit their preference for tutorship during their first semester in the Ph.D program. They have to opt for two courses from the lists below, of which at least one should be from the list of core courses,

  Core Courses: ESO202 (Mechanics of Solids), ESO208**,** (Numerical Methods) and TA101 (Engineering Graphics)

  CE Professional Courses: CE242 (CE Materials), CE262 (Engineering Hydraulics), CE331 (Geoinformatics), CE351 (Soil Mechanics), CE352 (Foundation Design) and CE412 (Water and Wastewater Engineering)

- DPGC shall assign them TA-ship in one or more of their chosen courses for the next few semesters. Students assigned as TAs to core course tutorials are expected to attend both lectures and tutorial classes of the course during their TA-ship.
- A CE DPGC member will be put in charge of assignment of TA-ship/Tutorship to Ph.D students in core/professional courses.
- After some time, these students may be assigned as tutor in one of the above course(s) for one semester. This assignment will be done as per departmental requirements, while taking the convenience of the student into consideration.
- Any student who has done TA-ship for at least two semesters in a core course shall be automatically deemed eligible to serve as tutor in that course.
- Any student who has either credited/done TA-ship in a departmental professional course for at least one semester shall be automatically deemed eligible to serve as tutor in that course.
- DPGC will devise a mechanism to ensure that students who performed poorly during core course TA-ship are not assigned as tutors to core courses.
- Students may also be assigned to tutorships in COM200 or PG-lab courses. The recommendation DPGC member from of the concerned specialization will be necessary before their assignment as tutors to PG-lab courses from that specialization.
- A student may volunteer for tutorship for more than one semester.
