

HIGEE Distillation setup at IIT Kanpur

Important Features

- Handles throughput of 0-4 lt/min
- Operating temperature: 90-110°C
- Operating pressure: 0-3 bar
- Reboiler heat duty: 0-70 kW
- Two circular discs of $\Phi 454$ mm with packing width of 30 mm
- Designed for Methanol/Ethanol, Acetone/Water system

Location:

Department of Chemical Engineering
IIT Kanpur
