

Title: Understanding Jugaad: A Multidisciplinary Approach

PI: MunMun Jha

Co-PI: Satyaki Ray, Braj Bhushan, Vimal Kumar,

Duration: March 2014 onwards

This project seeks to study the use of Jugaad in India. Jugaad is finding a work around for a problem for which regular or inexpensive solution is not available. The aim of such an innovation is to supposedly serve the people without compromising the safety, efficiency, and the utility of the products. However, Jugaad products usually lack basic safety features. This project will study Jugaad projects in the areas of transport and agriculture.
