

Forum of Regulators

4th Capacity Building Programme for Officers of Electricity Regulatory Commissions 18-23 July, 2011

Breakout Session for Participants

Dear Participants,

During the last capacity building program at IITK, a concept of a breakout session was introduced. This provides a platform for the participants from various electricity regulatory commissions to identify and deliberate on three identified topics in sub-groups.

A tentative list of topics identified for the breakout session are,

- Implications of ATE Decisions on the Regulatory Process
- Building Effective Consumer Grievance Redressal Forum
- Retail Tariff Design
- Performance Benchmarking
- Communicating Reforms
- Designing a Solar Rooftop Program

Three topics would be selected by the participants during Breakout Session-I on 19th July 2011. These would be further discussed and developed by the participants over the next four days. The findings of each group would be presented on Saturday, 23 July 2011.

The participants may like to deliberate on the above topics and bring relevant material for sharing during the discussion here. This would allow the participants to prepare beforehand and effectively contribute towards this participative activity. We would help you to structure the discussion and access relevant available material. The schedule for breakout sessions and presentation is as follows,

Day 2 - Tuesday, 19 July, 2011

1600 Hrs. – 1730 Hrs. Identifying three topics, group formation, and defining the scope for a structured discussion.

Day 6 - Saturday, 23 July, 2011

1100 Hrs. – 1230 Hrs. Final Presentation by participants on three identified themes.

Wishing you a useful and constructive discussion.

Anoop Singh

(Programme Coordinator)
