

Portfolio

I am a Visionary, an Innovative thinker and have passion for Creativity.

Rajesh Ranjan

REMOTELY ACCESSIBLE BOT

Design and Development Of Remotely Accessible Bot Using LabVIEW.

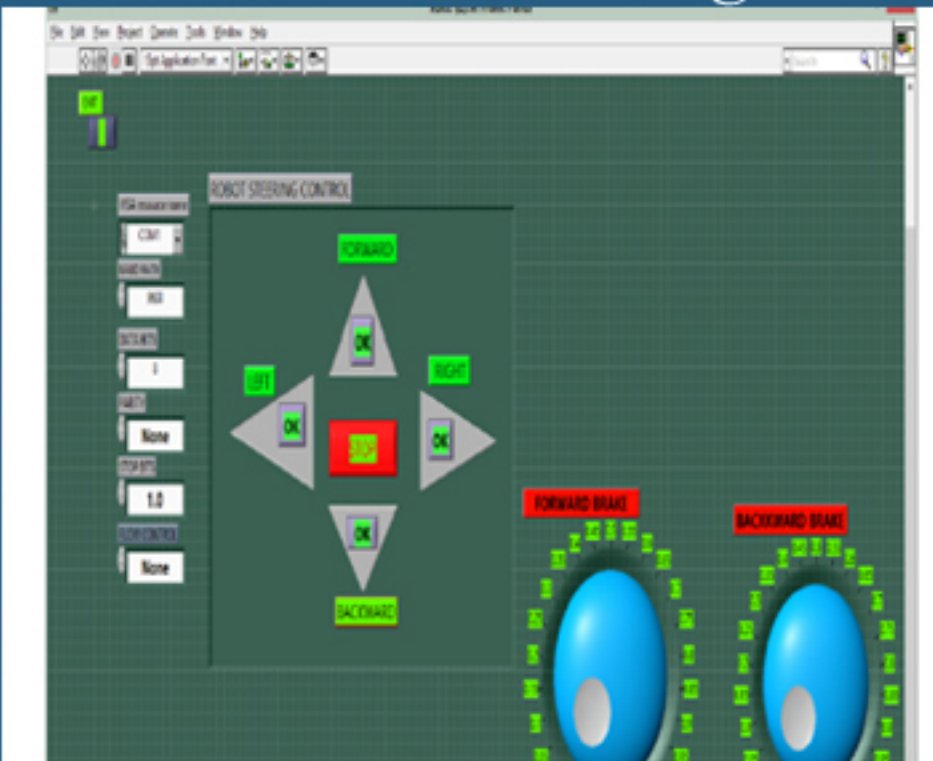

Prominent Features:

- controlled by any client pc in a remote distance through internet.
- an eye of the robotic system.
- another dimension to security for scanning remote locations.

Robot Hardware Design

Interface Panel Design

Prototype of Remotely Accessible Robot

Health Monitoring and Control through I-PAD

Health monitoring and control using smart phones, I-pad, I-phone.

Prominent Features:

- Data dashboards of Labview in I-pad. Interface development on I-pad.
- Network variables sharing between host computer and remote I-pad.
- Remote control can be done from I-pad using control shared variables.
- Remote monitor and control from any place in the world using network VPN connection between host and client.

Fu-Smart (A Remote Health Monitoring and Control Unit)

FU-SMART: Design and development of a Networked Health monitoring and Control system.

FU-SMART

PATENT PROCESS

Novel Features:

--Wired/Wireless data acquisition from multiple sensing units.

--Networking: Remote control of drug delivery system through Smart devices (like tab, i-pad, i-phone, laptops etc).

---Design of Drug delivery unit.

X-MACT (A μ C - Xbee communication based actuator)

A microcontroller -Xbee communication based actuator design for controlling flow of drugs in multiple pipes.

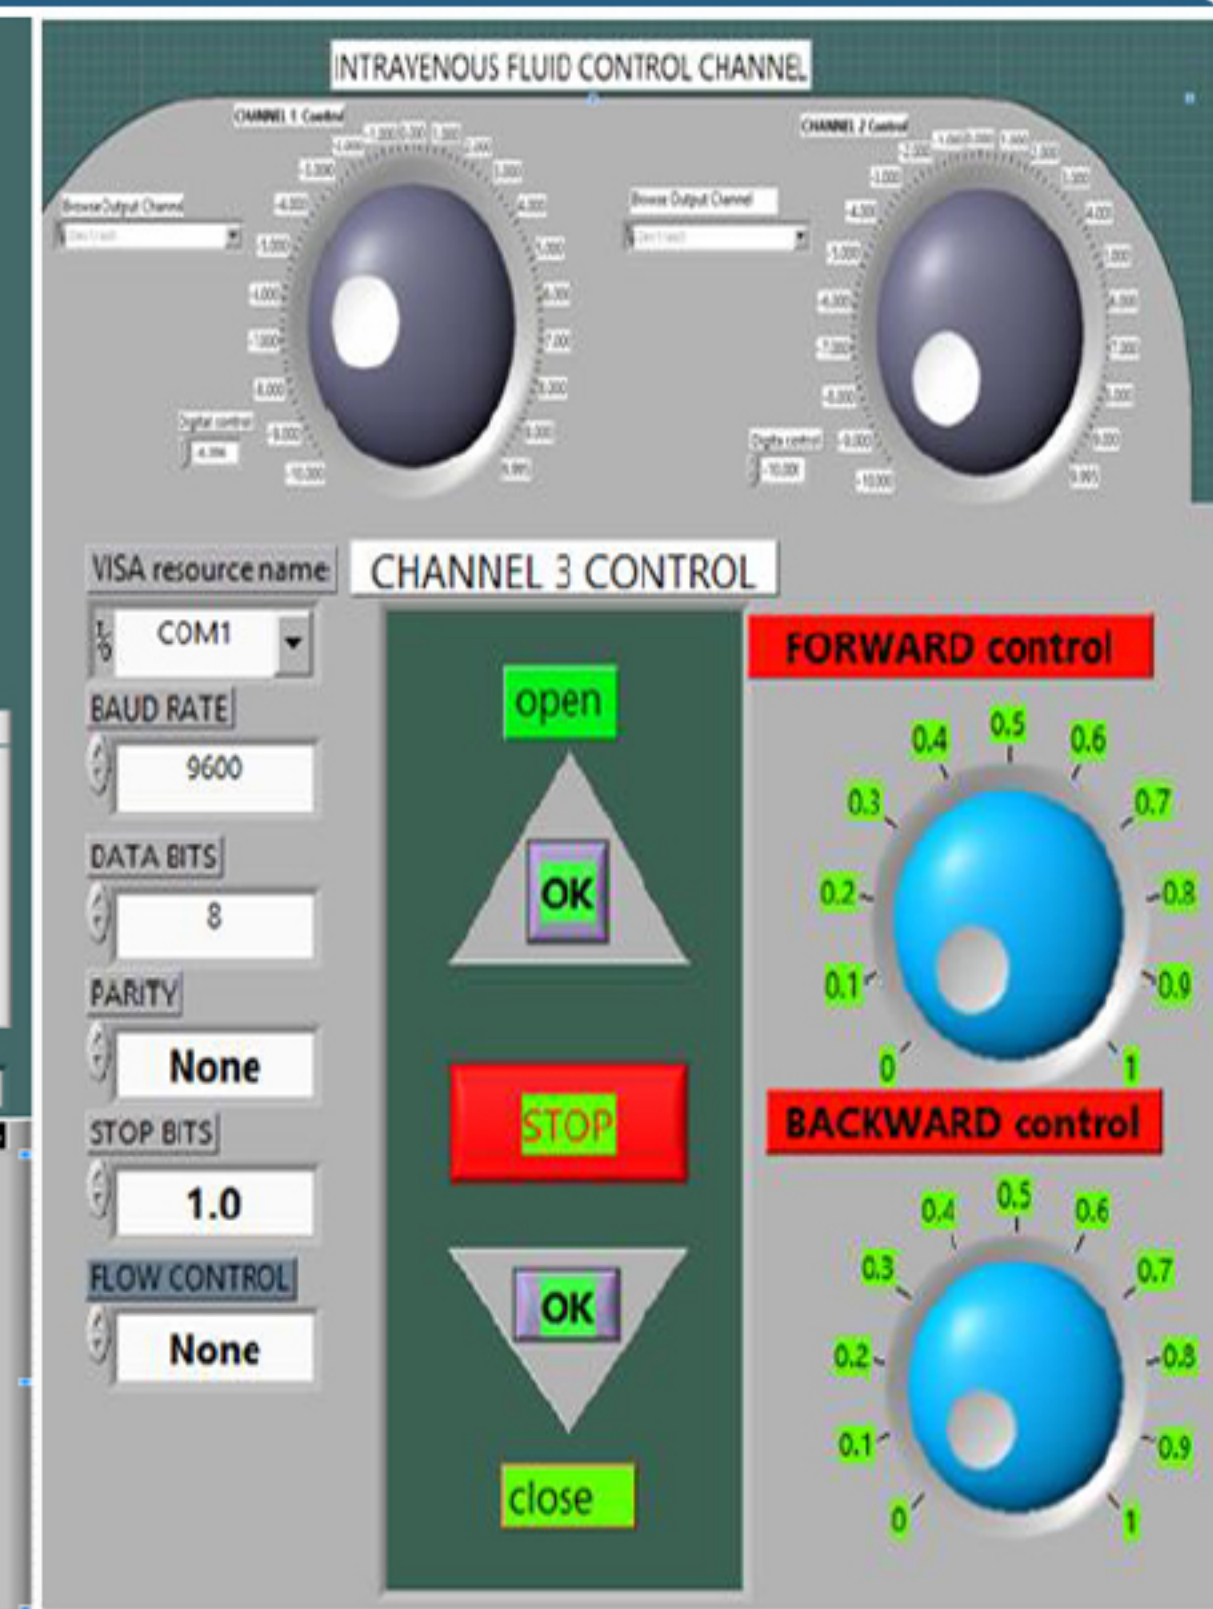

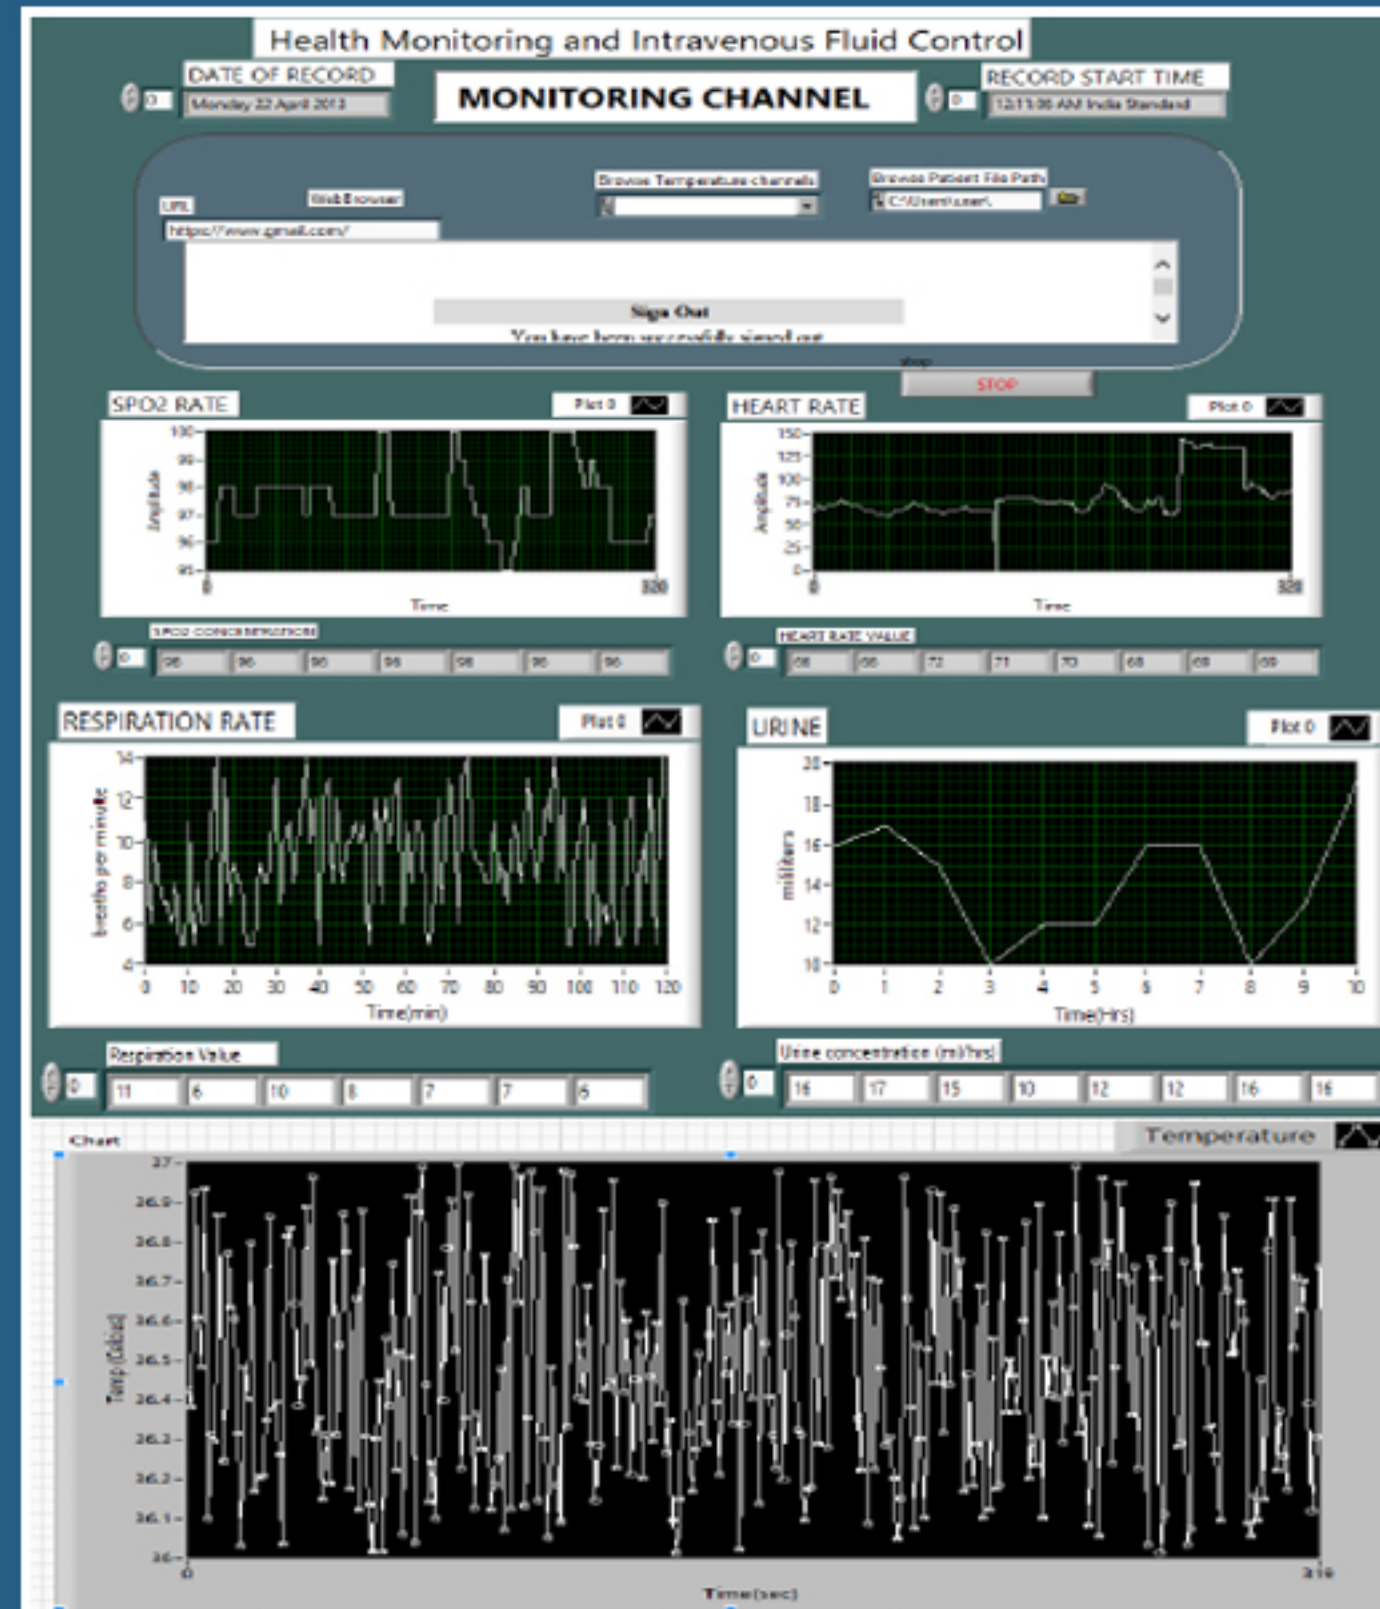

X-MACT

Patent Process

Biomedical Instrumentation & Automation and Control

A Biomedical application of online remote control system .

Prominent Features:

- Remote Health Monitoring System.
- Health Parameters. P02,Hemoglobin,PC02,PH of blood.
- Design of Networking interface for monitoring data from remote places.

Screenshot of Front panel Interface of Health Monitoring Parameters and control channels

SMACT (A Smart Actuator)

A Shape memory alloy based actuator is designed and tested for controlling the flow of drug through the pipes.

SMACT

Patent Process

PROTOTYPE	ANALYSIS
-----------	----------

PHOTOTHERAPY UNIT

Design and development of a Phototherapy unit to cure jaundice of new born babies and cater the needs of health care centres.

NAVJAT PHOTOTHERAPY UNIT

PATENT PROCESS

Novel Features

- Dual phototherapy treatment.
- Portability & compactness.
- Use of renewable and non-renewable supply source.
- Medium Cost.

VIRTUAL TRIAL ROOM

Design and development of a novel software based interface for trial of clothes on a virtual screen.

Features:

- Captures Photo.
- Creates user database.
- Drag and drop from catalogues.
- USB Upload.
- Instant Shopping.

PROTOTYPE LINK: file:///E:/Documents/IIT%20Kanpur/1st%20SEM/DES%20633%20-%20Int%20New%20Prod%20Devp%20-%20NT/VTR/vtr_final_v2_19nov.swf

Energy Harvesting (Renewable Sources)

Energy harvesting on moving train using wind energy as well as piezoelectricity.

A new Design of electricity generation from running vehicle using Wind Energy as renewable source of generation.

An efficient Design for Electricity generation in moving vehicles through Piezoelectric effect.

Green Product Design

A New Design of Water Level Controller in household storage tank.

Need: To stop wastage of water and electricity by switching off the water pump through an automatic cut-off system.

Prominent Features:

- A mechanical control system which
- Design of Ultrasonic transmitter- receiver section which is mounted on the pipe nearby the motor.

Part No.	Part Name	Material	Qty.	Remarks
1	Casing	Nylon 6/6 (PC)	1	Polished, Aluminium, Sandblasted.
2	Ultrasonic Sensor	Case: PET Polyethylene Terephthalate Cover: Polycarbonate	1	Control Temp. 40 to 80°C Power: 20-200mW 200kHz or 12-200kHz
3	Strap	Nylon webbing (N 142)	1	Stretched on the sides of the casing.
4	Connectors	Insulator material: Glass Filled Nylon 66 (UL94V0) Contact Material: Beryllium Copper / Phosphor Bronze Plating: Tin Over Nickel	1	
5	Wires	Arc welding	4	
6	Hinge	Stainless Steel	1	

NOTES:

1. The ultrasonic sensor is mounted on a PCB board which is attached to the top surface of the casing.
2. The casing fits pipe sizes 1-2.0 inch.
3. The upper surface of the mounting is cleaned and PCB is stuck to it with glue (PPG-C 96 for metal containers that conform to PPG-C 96, Type V, Class 2 for quantities of 22.7 kg, maximum) (adhesives) and kept in same fashion for 24hrs.
4. Connectors are also glued to a small opening at the top end surface of the casing.
5. Straps are inserted into the side holders of the casing and tightened.
6. Side holders are riveted on the casing on both sides.
7. Hinges are attached to the strap holders.
8. Riveting is done by arc welding on both sides to form holders for strap.

Water level Controller

DESIGN SCHEME

ALL DIMENSIONS ARE IN MILLIMETERS

SCALE: 1:1

SHEET 1 OF 1

Design Scheme

Prototype of New Design of Water Level Controller.

Peer to Peer Communication

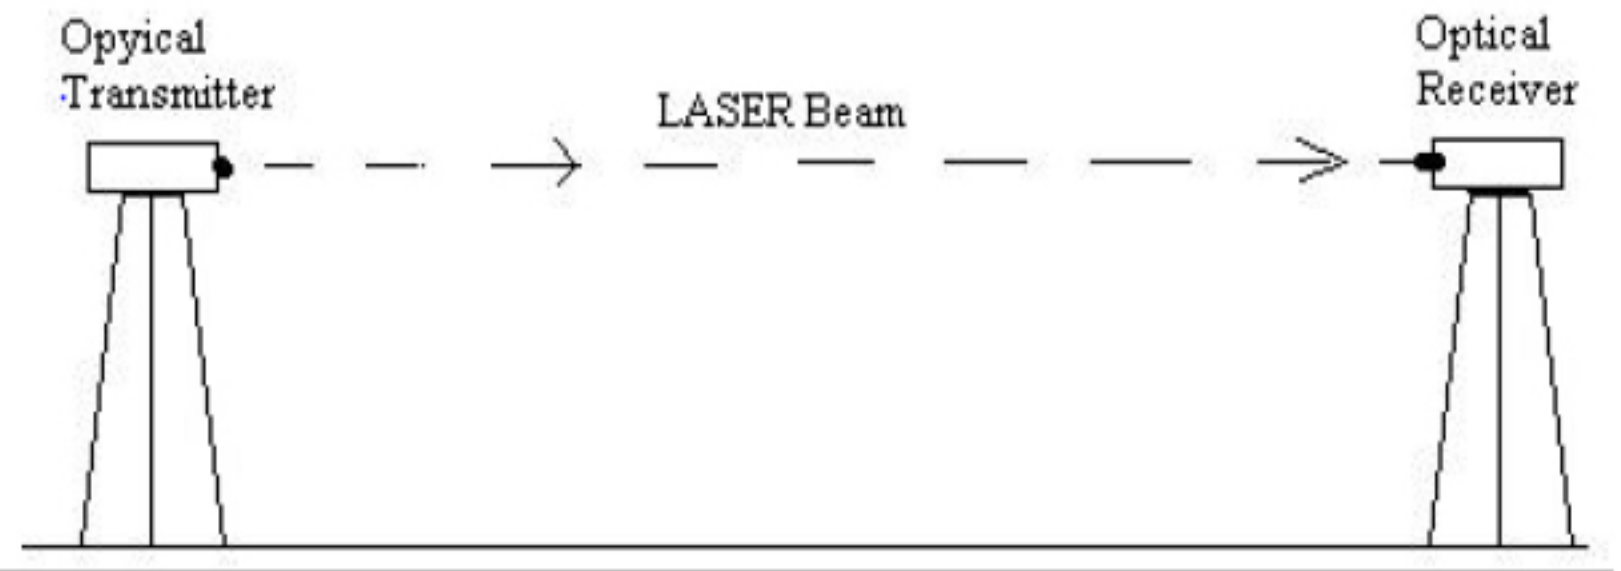

For communication in free space , an optical way of transmitting the required audio signal to other side is considered.

A point to point communication system using laser light

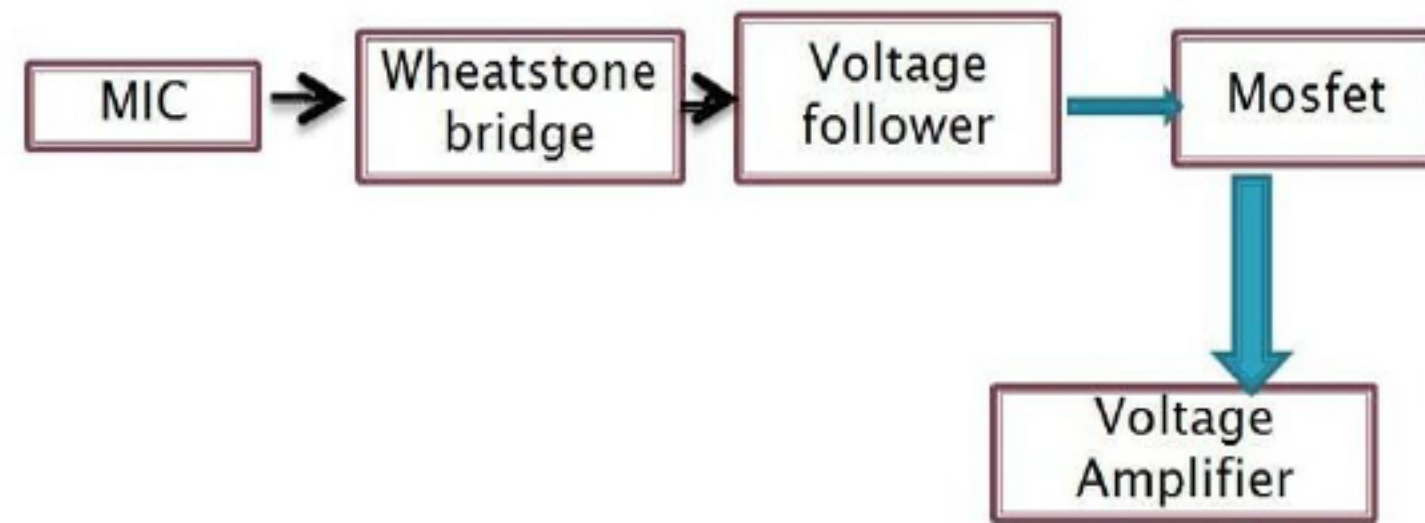

--Development of a communication system using a transmitter and receiver section, for voice transmission.

--Range in air is up to 500meters.

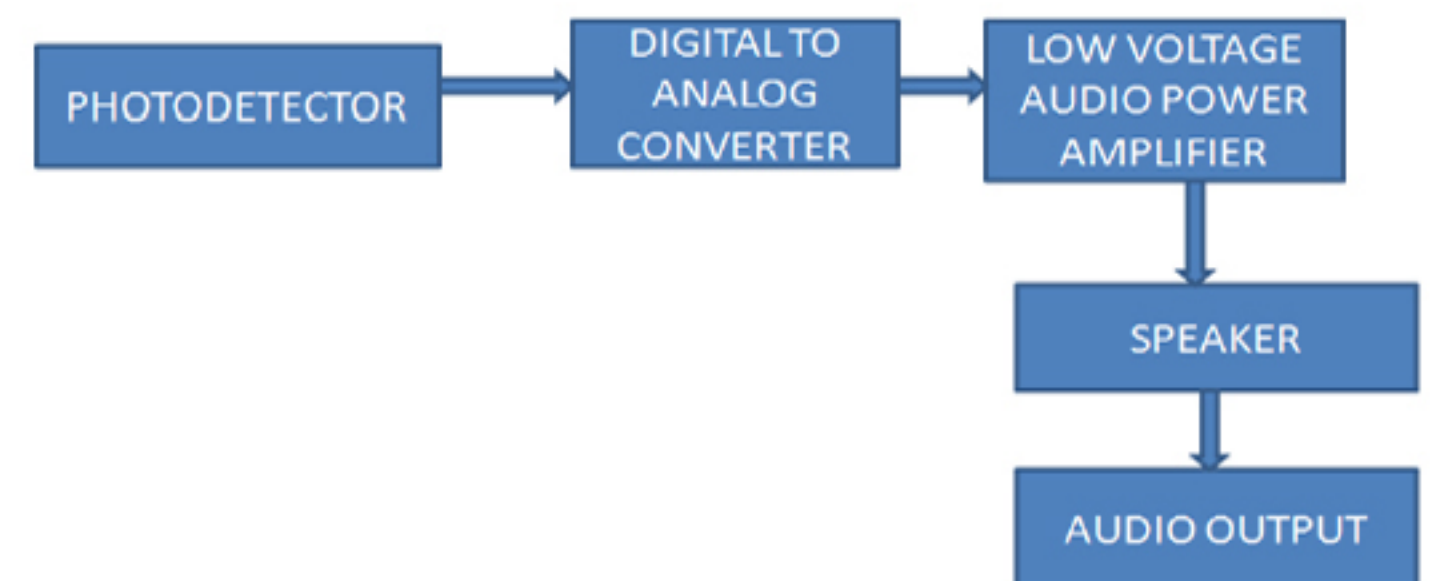

--Both the transmitter and receiver model is implemented .

INDIA- 208016
University email: raranjan@iitk.ac.in
Personal email: rajeshranjaniit@gmail.com
Date of birth: 19th March 1987
Contact: +91 9793566425
Skype Id: raranjan1987
Language: English, French, Hindi

EDUCATION

Indian institute of Technology Kanpur (2012-current)

DEGREE **CGPA**

Master of Design **9.5**

Vellore institute of technology (2006-2010)

DEGREE **CGPA**

B.tech Electronics **7.95/10**

& Instrumentation

S.R.P College (2002-2004)

DEGREE **PERCENTAGE**

HIGHER SECONDARY **54.55%**

Lohia Nagar Mount Carmel High school (Passed in 2002)

DEGREE **PERCENTAGE**

SECONDARY **81.17%**

Software Skills:

1. LabVIEW
2. Simulink
3. D-space
4. L-T spice
5. Solidworks
6. Photoshop
7. C basics
8. Working with Eye tracker .

Extra Curricular Activities:

- ☒ Cultural Secretary of HEC, IIT-Kanpur
- ☒ Organized the Hall Day cultural fest-Tarang at IIT-Kanpur.
- ☒ Member of Instrument Society of India.

Industrial Training:

Underwent Four week In plant training at Patratu Thermal Power Station, Jharkhand.

Objective

To work in an innovative and challenging environment, broaden my skill sets as well as enhance my cultural, design and technical horizons. I always use to discover new ideas for any set of problems that comes to me, especially which have a technical aspect. I give technical logics for solving day to day problems, which i have inculcated from my childhood. I am incredibly interested in research involving design aspects. I do believe that from all of these experiences I would acquire more broadened skill set, aiding in my successful career development.

Academic Achievement:

- ☒ Invited for conference and workshop at TED MINT organised by KTH Royal Institute of Technology, Sweden.
- ☒ Selected for Nokia PDP project at Aalto University, Finland.
- ☒ Selected for final year project internship in Technical University of Eindhoven, The Netherlands.
- ☒ Appreciated for two ideas in MY IDEA PROGRAMS organized jointly by TBI-VIT, IETE and L-RAMP, IIT MADRAS by giving new innovative ideas on Energy harvesting and stopping power wastage.
- ☒ Paper accepted for IEDEC Conference 2014 California, USA.

Hobbies:

- ☒ Discovering new Ideas
- ☒ Guitarist
- ☒ Music composition
- ☒ Cricket
- ☒ Volleyball
- ☒ Movie Making

Workshops/external courses:

- ☒ "Health monitoring and multi criteria optimization" by UK-INDIA Research initiative between universities of Sheffield U.K & IIT-Kanpur India.
- ☒ "Robo Veda" Robotics workshop.
- ☒ "Industrial and product design" by Dr. Prashant Kumar.
- ☒ "Product ecosystEms" by Raghu Kolli, Director Innovation workshops.
- ☒ "Product Design & Development" by Dr. A.K. Verma.
- ☒ "Control of Mobile Robots" Dr. Magnus Egerstedt on Coursera.org.
- ☒ "User Experience Design" by Mrs. Jhumkee Iyenger.
- ☒ "Aesthetic Design" by Ralf Weber, TU-Dresden.
- ☒ "Typography" by Dr. Uday Kumar.
